

## General description

**Innalabs AI-Q-701** tactical grade accelerometer is an ideal, ITAR-free choice for aerospace, defense, industrial, transport and civil engineering applications.

AI-Q-701 quartz-based servo accelerometer offers a dynamic range of  $\pm 30g$  with a one-year bias composite repeatability of  $<1200\mu g$  in a compact and ruggedized casing that provides a high shock and vibration resistance, matching the highest industry standards at a very economical price.

The AI-Q-701 features an internal temperature sensor that allows the user to carry out temperature calibration and compensation, enhancing the bias, scale factor and axis misalignment repeatability figures.

The AI-Q-701 is the optimum choice for a wide range of military and civilian applications such as: platform leveling, low-end tactical grade IMUs, INS for land military vehicles, control sensors for high speed trains, structural health monitoring and seismic sensors.

State-of-the-art manufacturing processes enable Innalabs to offer AI-Q-701 accelerometers at competitive prices.

## Accelerometer dimensions (mm)

## Features

- Tactical grade performance ( $<1200 \mu g$  one year bias composite repeatability)
- High Input Range (up to  $\pm 30g$ )
- Environmentally rugged
- Analogue Current output
- Compact design
- High thermal stability
- Internal temperature sensor for thermal compensation
- Dual built-in self test
- ITAR Free

## Applications

- Tactical grade Inertial Navigation Systems (INS)
- Inertial Measurement Units (IMUs)
- Flight control systems
- Unmanned systems and helicopters
- Platform leveling
- Structural health and maintenance
- Land and marine vehicles
- Inclinerometers for industrial and drilling
- Train and rail measurement systems
- Robotic systems control
- Seismic sensing

### Specifications

Parameters	Units	Values
Input Range	g	±30
Bias	mg	<8
One-year Composite Repeatability	µg	<1200
Temperature Sensitivity	µg/°C	<70
Scale Factor	mA/g	1.23 to 1.43
One-year Composite Repeatability	ppm	<1200
Temperature Sensitivity	ppm/°C	<200
Axis Misalignment	µrad	<2000
Vibration Rectification	µg/g <sup>2</sup> <sub>RMS</sub>	<50 (50-200 Hz) <100 (200-750 Hz) <150 (750-2000 Hz)
Intrinsic Noise	µg <sub>RMS</sub>	<7 (0-10 Hz) <70 (10-500 Hz) <1500 (500-10000 Hz) <sup>#1</sup>
Operating Temperature	°C	-55 to +96
Shock	g	250
Vibration Peak Sine	g, Hz	25g @ 20 to 2000 Hz
Resolution/Threshold	µg	<1
Bandwidth	Hz	>300
Temperature Model		Yes
Quiescent Current per Supply	mA	<16
Quiescent Power @±15V <sub>DC</sub>	mW	<480
Electrical interface		Temp Sensor
		Voltage Self Test
		Current Self Test
		Power/Signal Ground
		-9V <sub>DC</sub> Output
		+9V <sub>DC</sub> Output
Input Voltage	V <sub>DC</sub>	±13 to ±18
Weight	g	55 nominal, 57 maximum
Size	mm	Ø 28.4 x 21.65 Max
Case Material		300 Series Stainless Steel

**Note #1:** when a 1.6 kHz low pass filter on the output is implemented

**Note #2:** centre of mass deviation +/- 2.5 mm along each axis

### How to order

AI-Q-701 is directly orderable under this part number from Innalabs and our worldwide network of Agents and Distributors.

### Related Products

Innalabs offers a range of accelerometers based on the same design and production processes, including the AI-Q-1400 and AI-Q-2000 families.
